National Apparel & Facility Services Program for Biotechnology Innovation Organization

- Savings of 30-50% on uniform rentals and cleanroom garment services
- 3-year customer agreement with favorable terms for members
- 3-year fixed and upfront pricing
- Dedicated BIO customer service team
A well-designed, coordinated work apparel program from UniFirst delivers the professional image you want and helps build team spirit. It’s the best way to clearly establish employee identity and generate public confidence. And with our specialized biotechnology programs and facility service products, we can also assist in meeting your contamination control goals.

Whether it’s our specialized garment and protective clothing programs, our floor mat and microfiber wiper services, or our germ-killing GOJO® and Purell® hand hygiene products, you can count on UniFirst for managed solutions that satisfy your staff, help protect your “product,” and benefit your bottom line.

The products shown here are just a sampling of our comprehensive biotechnology offering. If you don’t see what you’re looking for, simply inquire with your UniFirst representative.
UniFirst managed apparel rental services for biotechnology operations include specialized laundering and processing within our strict Product Protection Process (PPP), which features portal-to-portal sanitization controls that deliver hygienically clean results you can’t get with more traditional laundering methods.

Our specialized wash formulas and procedures exceed ASTM, OSHA, and CDC protocols, and use EPA registered agents that “ultra” clean and remove contaminants, and produce self-sanitizing effects on fabrics.

Plus, our UniFirst employee Team Partners are specially trained in the many safety procedures and precautions required when servicing the unique needs of your industry.

For hygienically clean, high-quality apparel, trust UniFirst.

Facility services

UniFirst facility service customers use less water, chemicals, and labor to clean their facilities. That’s good for the environment and the bottom line.

Floor Mat Service
All of our UniFirst-made floor mats, from decorative carpet-tops and nitrile rubber scrapers to anti-fatigue mats, are designed for commercial foot traffic, and trap and hold dirt, dust, and moisture better than the alternatives. With UniFirst scheduled floor mat service, all soiled mats are picked up and replaced with hygienically clean ones. Our full-service program enhances your facility’s appearance and your business image. And to address your facility safety concerns, all of our floor mats are certified as “high traction” by the National Floor Safety Institute (NFSI).

Microfiber Mops & Wiper Service
UniFirst microfiber cleaning solutions support your contamination control goals. Our advanced microfiber mops, dusters, scrubbers, and wipers can be used wet or dry and allow you to clean faster with less water and chemicals. The super-absorbent fibers found in our microfiber products hold six times their weight in water, making them more absorbent than conventional cleaning products. Positively charged fibers attract and hold dust like magnets, allowing them to capture even the smallest of dust particles and germs. Using only water, microfiber cleaning products are proven to remove up to 98% of bacteria and 93% of viruses from surfaces. UniFirst’s regular pickup, delivery, and laundering service means you’ll never run out of clean microfiber.

*Tests performed by the U.S. Environmental Protection Agency. Published in Environmental Best Practices for Health Care Facilities: Using Microfiber Mops in Hospitals.

Ancillary products

Disposable Gloves & Safety Glasses
To help safeguard employees from the most common workplace injuries, UniFirst offers a selection of personal protective equipment (PPE), including: disposable gloves, safety glasses, eyewash stations, ear plugs, and more.

See the UniFirst Facility Services catalog for the complete line of ancillary products.
Regular weekly service ensures you have what you need, when you need it.

**Hand Care, Soap & Sanitizer Service**
UniFirst has teamed up with GOJO®, the best name in the hand care industry, to offer you a wide array of hand care and hygiene solutions that fight germs and help reduce cross-contamination.

Our dispensing systems are available in automatic “touchless” and traditional manual dispensing options that provide efficient portion controls resulting in less waste. For ease of use and to safeguard against contamination, our snap-in-place refill containers are also factory-sealed.

**Paper Towel & Sanitary Tissue Service**
To provide sustainable restroom cleanliness and hygiene solutions, UniFirst supplies TORK® towel and tissue products by SCA, which are Green Seal™ and EcoLogo™ certified and manufactured from base paper that is 100% recycled.

Portion-controlled paper dispensing systems reduce waste and come in traditional and “touchless” options. Easy-to-refill designs also help reduce maintenance time and costs.

**Air Freshener Service**
UniFirst offers environmentally friendly air freshener systems that neutralize odors at the molecular level, eliminating unnecessary chemical “masking” that could affect air quality. All of our odor control products meet stringent clean air standards and dispense fragrance in accordance with guidelines established by the International Fragrance Association to protect the environment and human health.

Our most popular air freshener system, TCell, provides the perfect environmental solution because it does not contain propellants or added VOCs, its components are all recyclable, and the standard dispenser requires no batteries.

We also offer a complete line of restroom products and services not shown. Just ask your UniFirst representative about other facility service options.
## Why UniFirst rental?

### ECONOMICAL SERVICE

**UniFirst rental service lowers overall costs**
- Eliminates upfront clothing investment costs
- Reduces inventory requirements, maintenance, and administration
- Includes regular inspections of all garments and products for automatic repairs or replacements
- Provides a dedicated service team to address questions or concerns

### PROFESSIONAL IMAGE

**UniFirst biotechnology apparel promotes a clean, consistent, and professional staff image**
- Provides professional-looking, well-fitted work garments
- Coordinates a unified look for all staff members
- Offers practical, high-quality choices for all departments
- Delivers clean, finished, ready-for-wear work garments
- Improves security and identification

### GARMENT SAFETY

**UniFirst managed apparel programs complement overall contamination initiatives**
- Assures hygienically clean garments with our Product Protection Process
- Helps prevent cross-contamination risks in “ultra-clean” environments
- Meets or exceeds OSHA and CDC guidelines for laundering processes
- Keeps work clothing safe for staff and “products”

### IMPROVED HYGIENE

**UniFirst hand hygiene stations and facility service programs improve safety and cleanliness**
- Improves facility cleanliness and infection control practices
- Features GOJO® hand hygiene products for almost any requirement
- Includes functional floor mats and advanced microfiber cleaning products
- Ensures automatic delivery and restocking, so products never run out

---

### Need specialized cleanroom services? Ask about our UniClean subsidiary.

- Sterile and non-sterile garment services for cleanrooms and other “ultra-clean” work environments
- ISO 3 and ISO 4 processing facilities, national coverage
- Contamination controls, including cleanroom cleaning, fogging, and environmental monitoring
- Cleanroom certifications
- Direct sale of consumable products (tacky mats, bouffant caps, wipers, etc.)
- Cleanroom facility equipment including evaluation, layout, and installation
- Full line of arc-rated, flame resistant cleanroom coverings
